

**HZ PackFilm Limited**  
Producer of PVC, APET Film

## Our Background

HZ PackFilm Ltd is a technology-based company with strength in development, production and global sales of packing film. We're committed to delivering our Rigid PVC film and Rigid APET film in compliance with national standardization such as SGS, ROHS, Food Grade FDA certification.

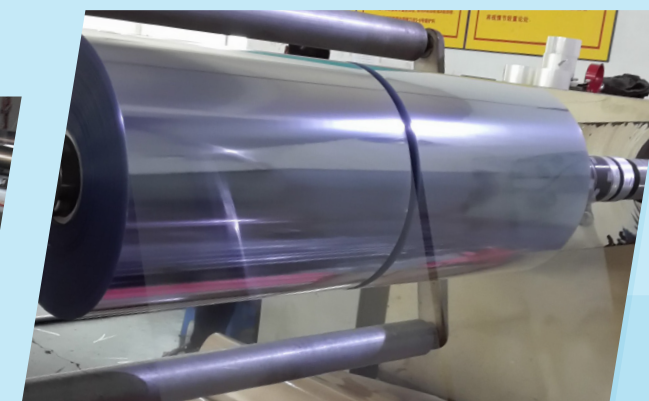

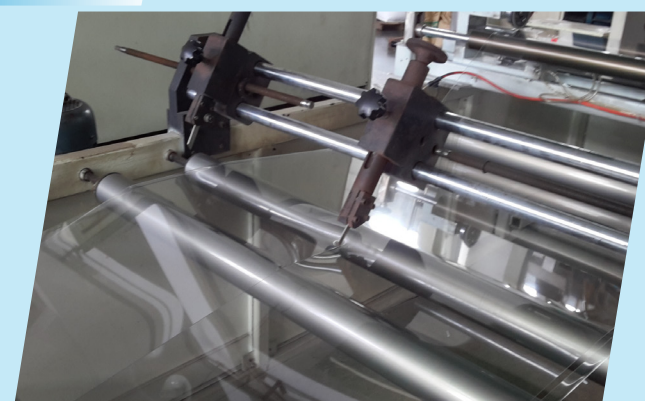

Our film, being marketed under the name of "HZ", is manufactured by advanced 3 calendar and extrusion production lines, accounting to 15,000 ton per annum. Found in 2009 with a production area of 4 floor height, our factory covers a total area of 20,000 square feet, including production, warehousing and office segment. By delivering a top-notch and high quality product, our film is widely applicable for thermoforming blister and tray, folding boxes, and other printing products.

HZ is a dynamic organization with a sustainable oriented culture. By adhering a collaborative business approach, we establish a strong ties with business partners, traders, distributors, and famous customers in local and overseas market, in terms of OEM brand as well as its own brand labeling. Our products are available worldwide in Europe, Asia Pacific, Middle East, Africa, America and other countries and regions.

## Rigid PVC Film

Rigid PVC film is ideal for deep & shallow draw and is engineered for most packaging application. Being easy de-nesting and mold release with or without silicone coating, it is specifically designed for thermoforming blisters, trays, clamshells, visual packaging and box making.

### TYPE

- Thermoforming grade
- Cold crack forming grade for extreme weather conditions
- Boxes grade
- Metalizing grade (gold & silver color)
- Flame retardant grade
- Food grade

### PRODUCT STATUS

Thickness	0.15 – 1.0mm
Width	200 – 950mm
Capacity	10,000 ton per annum

### APPLICATION

- Blisters, Trays, Clamshells and Visual packaging
- Non-whitening container box, boxes for detergents, shampoo, cosmetic packaging
- Food box, Candy packaging, Food tray and plate

## Rigid APET Film (Amorphous Polyethylene Terephthalate)

APET film (Amorphous Polyethylene Terephthalate) is considered to be a perfect alternative of PVC film for packaging application. It provides excellent impact strength, simple processing in folding and gluing without whitening. Being environmental friendly in base, APET is easily recycled and broken down into carbon compound without polluting world-wide.

### TYPE

- General Printing grade
- Thermoforming & Box grade
- Environmental recycle grade

### PRODUCT STATUS

Thickness	0.25 – 1.0mm
Width	200 – 1300mm
Capacity	10,000 ton per annum

### APPLICATION

- Hot and vacuum forming
- Crystal clarity box making
- Food, Medical & Teeth brush packing
- Industrial and Consumable box container
- Printing box for toy & shampoo packing
- Food box, Candy packaging, Food tray and plate
